The *Florida Scientist* is published quarterly by the Florida Academy of Sciences, Inc., a non-profit scientific and educational association. Membership is open to individuals or institutions interested in supporting science in its broadest sense. Applications may be obtained from the website.

Original articles containing new knowledge, or new interpretations of knowledge, are welcomed in any field of science as represented by the sections of the Academy, viz., Biological Sciences, Conservation, Earth and Planetary Sciences, Medical Sciences, Physical Sciences, Science Teaching, and Social Sciences. Also, contributions will be considered which present new applications of scientific knowledge to practical problems within fields of interest to the Academy.

Back issues of the *Florida Scientist* (and its precursor, *Quarterly Journal of the Florida Academy of Sciences*) can be found on the Biodiversity Heritage Library website (<http://www.biodiversitylibrary.org>).

CONTENTS

Editorial: 2013 year in review, and a new beginning (page 1)

James D. Austin

Shelled land snails of the Calusa shell mound, Ding Darling National Wildlife Refuge, Sanibel Island, and of Lee County, Florida (page 2–14)

Harry G. Lee
